## SCR

## Half wave power control

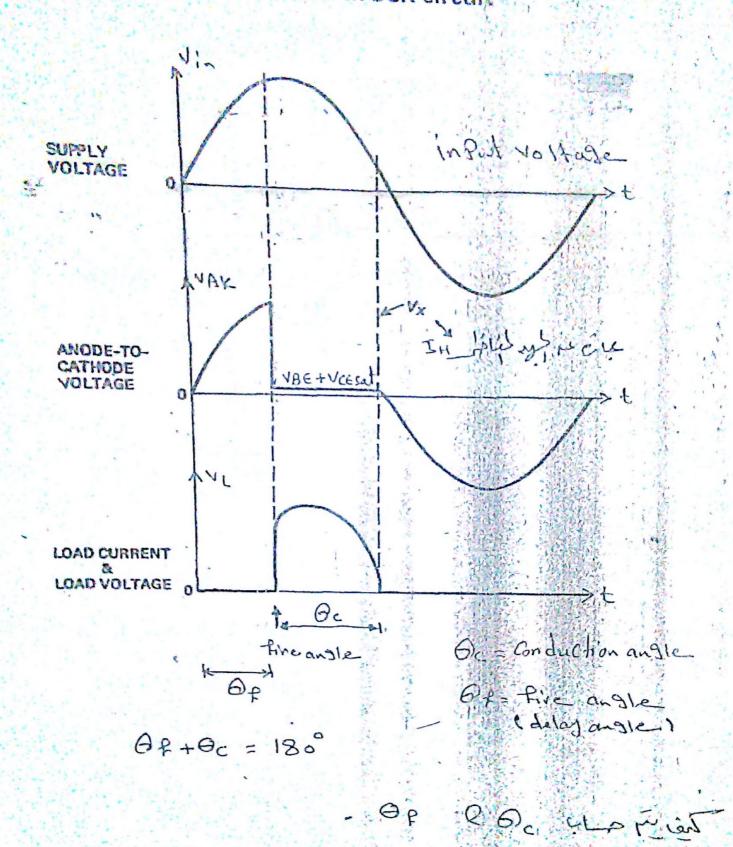

الهدف من التُجربة: فو التحكم في التيار او كنيه power في load وتحديد كل من fire angle وتحديد كل من conduction angle و ايضا رسم vave form ( Vax و Vax ) .

 $R_L = 1k$ ,  $R_1 = 1k$ , Diode , SCR (C106 D),  $R_2 = (5K)$ : Close of the scale of

## Waveforms in SCR circuit

 $\Theta_{c} = \frac{T_{c}}{T} \times 360$   $\Theta_{F} = 180 - \Theta_{c}$ 

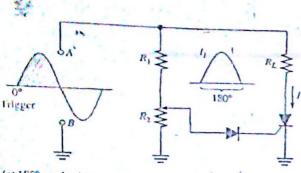

$$V_{AK} = V_{BE} + V_{CE}$$

ملحوظه عندما يكون (on) SCR

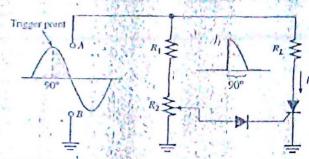

عن طريق المقاوما المتغيره يتم تغير

Vx هو م الجهد المناطق لـ H

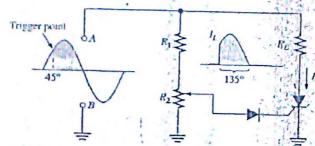

## Example

(b) 90° conduction

(c) 135° conduction

Good Luck
